Appendix D
Job Hazard Analysis (JHA)

Using the JHA below, complete the following steps:

**TASKS:** List each step (or task) required to complete the job.

*Example: Cryogenic liquid use*

**HAZARDS:** list all the hazards associated with each task; consider all hazard types:

*Examples:*
PHYSICAL- explosion, fire, frostbite.
CHEMICAL- asphyxiation, toxic.

**CONTROLS:** list controls for identified hazards for each step. Several controls may be necessary.

*Examples:*
- Use of proper containers rated for temperature and pressure
- Long sleeve clothing
- Tanks should not be filled to more than 80% capacity.

**TRAINING & EQUIPMENT:** list the required training and equipment needed.

**Personal Protective Equipment (PPE):** list the PPE to be used to control the hazards.

*Examples:*
- Face shield
- Insulated gloves
- Chemical splash goggles
- Lab Coat
